

Technical Data Sheet

Putzmeister SP11 DQR

The SP11 range of worm pumps offers an impressive, sophisticated design and simple operation. The machines are suitable for site mixes or bagged interior and external rendering, coloured mortar, limestone mortar, base plaster, light wall mortar, ornamental plaster, liquid screed and for filling and grouting work.

Equipment Features;

- Fully hydraulic pump and mixer drive
- Swivel Mixer
- Water metering
- Motor rpm adjustment
- Optimum sound damping due to cased motor
- Low noise emissions
- Infinitely adjustable output
- Analog or PLC control system
- High- pressure cleaner
- Mixing time adjustment

Technical Data

SP11^{DQR}

Machine model	SP11 DQR
Pump	worm pump 2L6
Output	0-12M/hr
Delivery pressure	25 bar
Engine	4 cylinder Kubota engine
Engine power	15,7kw
Chassis	Without brakes
Engine Rotations	2400UpM
Filling Height	758mm
Weight	1000kg
Length	3097mm
Width	1729mm
Height	1136 mm
Maximum grain size	6 mm
Pressure connection	M50
