

Technical Data Sheet

Brinkmann FHS 200/3

The Estrich Boy FHS is intended for the delivery of liquid screed and can be fed easily by a truck mixer. The screw conveyor pump runs forward and in reverse, the speed is variable and the discharge connection has a pressure barometer. The powerful hydraulic drive offers clockwise and anti-clockwise rotation of the screw conveyor and the output is infinitely variable. The radio remote control monitors all of the functions. The control of the liquid screed pump either takes place via the engine control system on the machine or by means of radio remote control.

Technical Data

Model	FHS 200
Version	Worm pump 7515
Output	15m ³ /h
Engine	3 Cylinder Deutz, 32,8 Kw
Chassis	With brake, 80 km/h bis km/h
Weight	960kg
Length	4200mm
Width	1300mm
Height	1280mm
Filling height	1000mm
