

Technical Data Sheet

Putzmeister MP25

Quickly disassemble into easy to handle portable components

The components can be easily carried to the tightest of areas

All components set up ready to use.

The MP25 mixing pump is the all-rounder among plastering machines, whether you're working with sack material or from silos or containers. The MP 25 process all pumpable premixed dry mortar. It handles all pumpable ready-mixed mortars such as ground coat plasters, adhesive mortars, reinforcement mortars, refractory mortars and texturing plasters both inside and out. This machine has unrestricted operational possibilities and is very easy to disassemble.

Technical Data

MP25

Conveying Performance	Up to 25 l/min
Conveyor Pressure (D [^] Poer)	40bar
Max conveying distance	40m
Max vertical height*	15m
Mixing pump drive	El.Motor 5.5Kw, 400v, 50HZ
Drive star wheel	El.Motor, 1.1kW
Waterpump	3.4m ³ /h 0.78kW
Compressor	200l/min. 0.55kW
Hopper content	115L
Weight	240Kg
Length x Width x Height	1324 x 728 x1443mm
