

Technical Data Sheet

Putzmeister SP20^{DHF}

The SP20^{DHF} is our most powerful worn pump for self levelling floor screed with outputs of up to 18m³ /min. With a real power machine such as the SP20 laying even large areas extremely quickly does not pose any problems. As the pump is usually filled from a truck mixer it has a particularly large hopper, it can process 7m³ in less than 30 minutes. When placing self levelling floor screed directly from the truck mixer, its strengths become apparent, no matter whether its anhydrite, cementrite or cement self levelling screed etc. The range of materials you can pump is enormous.

Technical Data SP20^{DHF}

Delivery pressure	(Pump 7515) 35 bar (Pump 2L8) 25 bar
Theoretical delivery rate*	(Pump 7515) 15m ³ /h (Pump 2L8) 18m ³ /h
Delivery Range	Up to 180m
Delivery height	Up to 90m
Diesel Engine	3-cylinder, 32.8kW at 2,600 rpm
Weight	960kg approx.
Length with towbar x Width x Height	4200mm x 1300mm x 1280mm
Filling height	1000mm

* The delivery rate is theoretical and depends on the pump pressure.

Depending on the pump used, the delivery rate may be higher or lower.

** The data is based on experience and is dependent on the materials used.
